Overview:

- Creative Coding I is a fully online introductory programming course for Media Artists without pre-requisites. We create games, art, and other digital representations using various visual and written programming languages. We study how our mindset can influence the art we create and our formed expressions.
- Explore digital art in a new and exciting way through computer programming. Blend the traditional with technology to create some new. Learn that programming is an art form unto itself and learn how graphical visualizations integrate with many different disciplines. Anyone is welcome, and we interact with one another online in new ways to enhance each other's art and engagement.

Late Drops:

The University's policy on drops after **45** days of instruction is very specific. The School of Visual and Media Arts follows this policy rigorously. There are five circumstances under which a late drop might be approved: registration errors, accident or illness, family emergency, change in work schedule, no assessment of performance in class after this deadline. Except in very unusual circumstances, I will only approve late drops if there is documented justification for one of these circumstances.
